

# Turn into a pro full stack developer with over 130 hours of computer science learning, now just \$39

BY DANNY ZEPEDA | JANUARY 17, 2017

A full-stack programmer is a technological jack-of-all-trades — someone who's mastered front-facing web design processes and back-end technologies alike. You'll acquire all the knowledge that underscores a wide range of programming know-how with this [Full Stack Programmer Bundle](#), now only \$39 in the TechnoBuffalo Deals Store.

Across 130 hours of instruction, you'll have access to the motherlode of web creation content. [Become well-versed in a handful of](#)

fundamental programming languages and disciplines, including Python, PHP, Ruby, and Bootstrap, plus dig into more advanced functions like how to build and manage databases.

You'll also explore environments that help you automate your code (Kubernetes and Docker), and get up close and personal with newer technologies (Google Go or the dynamic Julia programming language). And you'll chart all your progress with the instructors' Learning Management System, making sure you're progressing and retaining your knowledge.

Get the hardcore computer science instruction you need to elevate your career with this Full Stack Programming Bundle, [now over 90% off while the deal lasts](#).
